

Chemistry is the science that studies all atomic and molecular components of matter and their transformations. The world is composed of numerous chemical elements; here are commonly used words in chemistry:

- **Un scientifique:** a scientist
- **Un chercheur:** a researcher
- **Un chimiste:** a chemist
- **Un ingénieur:** an engineer
- **Acide:** acid
- **Atome:** atom
- **Base:** base
- **Catalyseur:** catalyst
- **Composé:** compound
- **Element :** element
- **Gaz:** gas
- **Ion:** ion
- **Laboratoire:** laboratory
- **Liaison chimique:** chemical bond
- **Liquide:** liquid
- **Masse molaire:** molar mass
- **Molécule:** molecule
- **Réaction:** reaction
- **Solution:** solution
- **Solvant:** solvent
